### Educational Objectives for all MPH students

1. To provide students with core knowledge and competencies in the five areas of public health: epidemiology, statistics, environmental health, health services administration, and the behavioral and social sciences. (ASPH MPH competencies)

2. To provide students with an opportunity to integrate and apply skills they have mastered in their curriculum in a public health setting.

3. To provide students with a culminating experience where they demonstrate their mastery of Public Health content and discipline specific content.

4. To provide students with multiple opportunities to develop writing and speaking skills, presentation skills, and teamwork skills.

5. To provide students with the experience to review science-based literature, synthesize its content, and apply evidence-based practices in the community.

6. To prepare students to enter the Public Health workforce and assume positions of leadership through progressive career development and demonstrate Public Health professionalism.

7. Each student will pursue one of the five core areas of Public Health in-depth completing the required credits for an MPH degree as outlined for each of the five disciplines.

### MD/MPH Degree Objectives, Fall 2012 and Spring 2013

#### MD/MPH Degree Educational Objectives

1. Demonstrate mastery of core public health disciplines.

2. Demonstrate mastery of the learning objectives specific to the chosen MPH concentration.

3. Demonstrate integration of public health knowledge through research or comprehensive examination.

4. Apply and integrate program knowledge and skills through practical field experience in a medical or non-medical setting, and fulfill other specific MPH field practice learning objectives.
