ENVIRONMENTAL HEALTH

40 Years
1981-2021

The Division of Environmental Health is committed to improving both human and environmental health for all through education, research, and environmental justice

RESEARCH AREAS

Our division focuses on improving environmental health through reducing **water scarcity**, ensuring **safe food and homes**, improving **air quality**, understanding **coastal pollution**, and using our data to change **policy**

GLOBAL IMPACT OF ENVIRONMENTAL HEALTH

Faculty, alumni, and students have performed research and study abroad programs in **5 different continents**, including studies on air quality and environmental contaminants

SUCCESSFUL STUDENTS

Over the years, environmental health students have received prestigious awards, including **Fulbright Scholarships, Switzer Fellowships, SeaGrant State Fellowships, TRDRP Cornelius Hopper Diversity Student Awards, and MHIRT Fellowships**

DIVERSE CAREER PATHWAYS

Alumni work in a wide array of fields, including:

- Federal, state, and county environmental health departments
- Ecotoxicology and contract research
- Occupational health and industrial hygiene
- Environmental justice and conservation
- Clinical and research careers
- Biotech and pharmaceutical toxicology
- Military occupational and environmental health
