

CURRICULUM VITAE

Hee-Jin Jun. M.P.H., Sc.D.

Office Address: San Diego State University
Graduate School of Public Health &
Institute for Behavioral and Community Health
9245 Sky Park Court, Ste.224
San Diego, CA 92123

Work Phone: (339) 368-0406

Work Email: hjun@sdsu.edu

Work Fax: (619) 594-1462

Education

Postdoctoral Research Fellow, Channing Division of Network Medicine (Rosalind J. Wright, MD),
10/2002-9/2005

Brigham and Women's Hospital/Harvard Medical School, Boston, MA

Postdoctoral Research Fellow, Department of Social and Behavioral Science (Dolores Acevedo-
Garcia, PhD), *9/2002-8/2005*

Harvard T.H. Chan School of Public Health, Boston, MA

Sc.D., Social Epidemiology (Ichiro Kawachi, Advisor), *10/2002*

Harvard T.H. Chan School of Public Health, Boston, MA

M.P.H., Medical Sociology, *2/1993*

Seoul National University School of Public Health, Seoul, Republic of Korea

B.A., Major in Sociology and minor in History, *1983*

Ewha Woman's University, Seoul, Republic of Korea

Professional Positions

Academic Positions

Investigator/Adjunct Assistant Professor, *2014-Present*

San Diego State University Research Foundation/Graduate School of Public Health, Division
of Health Promotion and Behavioral Science, San Diego State University, San Diego, CA

Associate Epidemiologist/Instructor of Medicine, *2008-2012*

Channing Division of Network Medicine, Brigham and Woman's Health/Harvard Medical
School, Boston, MA

Research Associate, 2012-2015

Channing Division of Network Medicine, Brigham and Woman's Health/Harvard Medical School, Boston, MA

Graduate Student Researcher, *1998-2002*

Department of Social and Behavioral Science, Harvard T.H.Chan School of Public Health, Boston, MA

Affiliated Institution Positions

Core Investigator, *2015-Present*

Center for Research on Sexuality and Sexual Health, San Diego State University Research Foundation

Affiliated Investigator, *2014-Present*

Institute for Behavioral and Community Health (IBACH), San Diego State University Research Foundation

Associate Epidemiologist, *2008-2012*

Channing Division of Network Medicine, Brigham and Women's Hospital, Boston, MA

Research Associate, *2005-2008*

Department of Social and Behavioral Science, Harvard T.H.Chan School of Public Health, Boston, MA

Postdoctoral Fellow, *2002-2005*

Channing Division of Network Medicine, Brigham and Women's Hospital, Boston, MA

Postdoctoral Fellow, *2005-2005*

Department of Social and Behavioral Science, Harvard T.H.Chan School of Public Health, Boston, MA

Honors

School of Public Health Scholarship, *1998-2000*

Harvard T.H.Chan School of Public Health, Boston, MA

School of Public Health Scholarship, *1991-1993*

Seoul National University, School of Public Health, Seoul, Republic of Korea

Professional Growth

Professional Societies

1999-Present American Public Health Association

2002-Present Society for Epidemiologic Research

Editorial Activities

Ad Hoc Reviewer

Annals of Epidemiology

American Journal of Public Health
Cancer Causes and Control
Child Abuse and Neglect
Drug and Alcohol Dependence
Journal of Adolescent Health
Journal of Epidemiology and Community Health
Nicotine & Tobacco Research
Social Science and Medicine
Public Health Nutrition
Women's Health Issues
Lesbian Health Fund grant review

Funded and Unfunded Research Projects

Current

2023-2028 Multi-level interventions to mitigate ethnic disparities in the management of chronic spine pain

R01/NIH (Monroe/Gombatto, PI)

Co-Investigator

This stepped-wedge clinical trial aims to mitigate ethnic disparities in access to and engagement in physical rehabilitation for spine pain by addressing barriers at multiple levels of influence along the care continuum in a Federally Qualified Health Center serving diverse, low-income communities.

2024-2026 Upstream risk factors for behavioral health and suicide in military personnel: An examination of social determinants of health

Department of Defense, Military Operational Medicine Research (Walter/Schmied, PI)

Co-Investigator

To develop a social determinants of health screener; To identify determinants of mental health outcomes among active-duty military personnel.

2021-2024 Development & Evaluation of Tailored Sexual Assault and Alcohol Misuse Prevention in Military Settings

W81XWH-21-9-0011.012/DOD (Kan/Schmied, PI)

Co-Investigator

To Develop and Evaluate Tailored Sexual Assault and Alcohol Misuse Prevention Programs in Military Training Commands.

2022-2024 Patterns of Telebehavioral Healthcare Utilization among Active Duty Service Members across the Military Healthcare System

HT94022210011/DOD (Schmied/Walter, PI)

Co-Investigator

To examine tele-behavioral healthcare utilization in military personnel.

2022-2024 Ecological Momentary Assessment of Stress, Socialization, and Smoking among LGBT Adolescents

T32IP4725/ TRDRP (Calzo, PI)

Co-Investigator

The goal of this research is to evaluate the acceptability and feasibility of an ecological momentary assessment protocol to measure minority stress exposure, exposure to smoking socialization, and behavior; and to develop a just-in-time adaptive intervention (JITAI) for smoking behaviors among LGBTQ+ adolescents.

Past

2018-2023 SDSU HealthLINK Center for Transdisciplinary Health Disparities Research
U54 MD012397-01A1, NIH/NIMHD (Ayala/Wells, PI)

Co-Investigator

The goal of the SDSU HealthLINK Center for Transdisciplinary Health Disparities Research is to enhance capacity and improve infrastructure at SDSU and its partner organizations to advance minority health and health disparities research among racially/ethnically diverse, sexual and gender minority, and lower-income populations using a community-engaged transdisciplinary research approach.

2019-2023 Real-time Assessment of Minority Stress and Physiological, Psychological, and Behavioral Responses among SGM Young Adults

Pilot award under Grant 5U54MD012397-02

Primary-Investigator

A pilot study to develop a methodological protocol able to validly and reliably measure minority stress exposure and physiological, psychological, and behavioral response in real time using EMA and non-invasive, wearable sensor technology. Secondly, the feasibility of real-time measurement of minority stress and responses in a sample of diverse sexual and gender minority young adults will be assessed by EMA questionnaire prompts 4 times daily, and through a wearable sensor continuously for 14 consecutive days.

2017-2022 A brief, peer co-led, group-based eating disorder prevention program for sexual minority young adult men

5R01MD012698, NIH (Blashill, PI)

Co-Investigator

Randomized controlled trial to test the efficacy of the PRIDE Body Project compared to a time- and attention-matched media advocacy condition to reduce and prevent eating disorders symptoms and onset in young adult men who are gay or bisexual.

2013-2018 Substance Disorders, Substance Use Treatment, and Sexual Orientation in Youth

R01DA033974, NIH (Dr. Corliss, PI)

Co-Investigator

The goals of this mixed methods study are to advance understanding of: 1) the extent to which substance disorders disproportionately impact sexual-minority youth, 2) causal mechanisms contributing to sexual-orientation-based disparities, 3) specific barriers sexual-minority youth face receiving needed treatment, and 4) effective treatment strategies in this population.

2014-2017 Type 2 Diabetes and Sexual Orientation Disparities in Women

R01DK099360, NIH (Dr. Corliss, PI)

Co-Investigator.

Epidemiologic study of sexual orientation disparities in type 2 diabetes and related risk factors in women participating in the Nurses' Health Study II cohort.

2011-2016 Sexual Orientation and Obesity: Test of a Gendered Biopsychosocial Model

R01HD066963, NIH (Austin, PI)

Co-Investigator

Epidemiologic study to test a gendered biopsychosocial model to explain sexual orientation disparities in obesity using prospective, repeated measures survey data and also biological data from three national youth cohorts.

2013-2015 Imperial County Childhood Obesity Prevention

U18DP003377-01, CDC (Ayala, PI)

Co-Investigator

The major goal of this demonstration study is to test a multi-level, multi-sector intervention to prevent and control childhood obesity.

2013-2015 Introducing Child Menus in Restaurants to Improve Access to Healthier Foods

R21 HD071324, NIH (Ayala, PI)

Co-Investigator

This study proposes to change the restaurant food environment by modifying what is offered to children and promoting these changes through a marketing campaign and employees.

2007-2012 Violence, Genes and Cardiovascular Events in Women

5R01HL081557-03, NIH (Rich-Edwards, PI)

Co-Investigator

We proposed to examine types of abuse and life stages at abuse as predictors of incident hypertension, hypercholesterolemia, diabetes, and cardiovascular disease events in a prospective cohort of 68,518 women who answered a detailed lifetime abuse questionnaire in 2001 in the NHSII.

2006-2011 Impact of Violence on Obesity and Reproductive Axes in Youth

5R01HL081557, NIH (Wright, PI)

Co-Investigator

We proposed to measure family violence exposure in a sub-cohort of adolescents and young adults participating in the Growing Up Today Study (GUTS). In addition, salivary cortisol rhythms were examined in relation to history of violence exposure and as a mediator between violence exposure and the proposed outcomes in a subsample ($n = 1200$).

2010-2011 Social Determinants of Adverse Health Outcomes in Lesbian, Gay and Bisexual Youth: A Prospective Study of U.S. Adolescents

Robert Wood Johnson Foundation Health & Society Scholars Seed Grant (Hatzenbuehler, PI [Columbia-Prime])

Principal Investigator. (BWH-sub)

We proposed to examine whether lesbian, gay and bisexual (LGB) adolescents living in environments that are more hostile to sexual minorities would have greater increases in tobacco/alcohol use and depressive symptoms, compared to LGB adolescents living in more supportive environments

2009-2011 Developmental Origins of BMI Trajectory among Adolescents
R03, HD060202-02, NIH (Jun, PI)

We proposed to examine the influence of prenatal and postnatal factors on BMI trajectory among youth transitioning from late childhood and adolescence into early adulthood. Given that obesity in childhood and adolescence increases risk for obesity in adulthood, research aimed at enhancing our understanding of potentially modifiable risk factors for an elevated BMI trajectory is important.

2007-2011 Breast and Colon Cancer in Lesbian and Bisexual Women: A Prospective Study.
RSGT-07-172-04-CPPB, ACS (Austin, PI)

The goal of this work was to examine risk factors for breast cancer and colon cancer throughout the life course in lesbian, bisexual, and heterosexual women in the Nurses' Health Study II. In addition, we applied the Rosner-Colditz breast cancer prediction model and the Rosner-Wei colon cancer prediction model to examine sexual orientation group differences in risk.

2007-2011 Genetic Determinants of PTSD in Women
5R01MH078928, NIH (Karestan/Wright, Co PIs)
Co-Investigator

We proposed to use the unique resource of the NHS II to conduct what promised to be the largest candidate gene association study of PTSD to date. We posited inherited vulnerability to PTSD was mediated by genetic variation in three specific neurobiological systems whose alterations were implicated in PTSD etiology: the hypothalamic-pituitary-adrenal axis, the locus coeruleus/ noradrenergic system, and the limbic-frontal neuro-circuitry of fear.

2005-2006 The Effect of Witnessing Family Violence in Childhood on Obesity
RWJF/Harvard Center for Society & Health Grant (Jun,PI)

We proposed to examine the impact of children's exposure to family violence, a specific chronic psychosocial stressor, on their developmental health. The main hypothesis of the study was that high-level family violence exposure (witnessing family violence) during childhood increases the risk of obesity relative to lower-level or no family violence.

2002-2005 Poverty, Childcare Responsibility, and Women's Smoking
ASPH/American Legacy Foundation L4002-02/3 (Acevedo-Garcia, PI)
Co-Principal Investigator. (\$30,000)

The purpose of this work was (1) to analyze the relationship between poverty, childcare responsibility and women's smoking in the Tobacco Use Supplement of the Current Population Survey (TUS-CPS), 1995-1998; and (2) to analyze the contextual effect of state welfare policy, tobacco control policy, and women's status on women's smoking.

2002-2003 Chronic Life Stress and Incident Asthma in Adult Women
R01 HL64108, NIH (Wright, PI)
Co-investigator

The purpose of this work was to explore the role of stress in the expression of asthma. This was done prospectively by examining the association between a specific life stressor (i.e., intimate violence exposure) and adult-asthma among women participating in the Nurses' Health Study.
